Nissan Australia has today announced that they will be bringing a special edition of “Godzilla”, the all wheel drive sports car know as the Nissan GT-R, to Australia.

The Black edition, as it will be called, features upgraded Recaro seats, and special Rays light weight wheels.

The new model will go on sale from next month with an expected drive away price which will give you \$10 change from \$200,000

The Black Edition sees the addition of skilled craftsmanship to the already breathtaking performance of the GT-R, with striking features such as an impressive carbon fibre rear spoiler and red and black interior treatment.

Specially-commissioned Recaro front seats, featuring red leather-accented trim, offer ergonomic support and comfort for both track days and the daily commute.

Metallic black forged alloy 20-inch RAYS six spoke wheels are super-lightweight to reduce unsprung weight, while also featuring knurled beads to help prevent tyres moving on rims under hard acceleration.

“The GT-R Black Edition has already proved popular in other markets, so we are pleased to introduce this exciting model to Australia,” said Nissan Motor Co (Australia) Managing Director and CEO William F Pepper Jr.
